EXTERNAL MEMORY KEYBOARD FOR ICOM RADIOS

https://chelegance.com/products/cntou-external-memory-keyboard-for-icom-yaesu/

1-1. DESCRIPTION & SPECIFICATION

The External Memory Keypad consists of a control keypad and a 1m cable.

The ICOM Keypad offers eight memories for pre-recorded messages in different operating modes. This is especially useful in contests, but can also be used for any CQ call or other standard text.

These memories are available for CW, RTTY and SSB, and can normally be recalled via the touch screen. However, since you usually want to display something else on the screen, this extension offers the possibility to recall the eight memories with an external keyboard. This makes it much easier to run a contest or work through a pile-up.

Product Name	ICOM External Memory Keypad
Product weight	50g
Size	44*18*69 mm + 1m cable
Storage Channel	8
Support Mode	SSB/CW/RTTY
