

Here are some notes regarding Grounding Plate Disc:

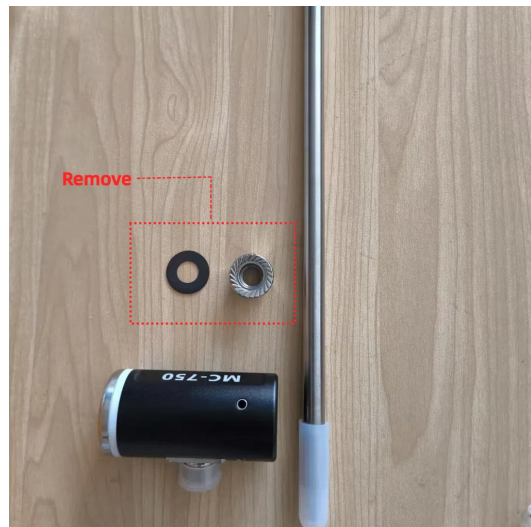

1. It is not only suitable for the MC-750 antenna, but also can be used in conjunction with other GP antennas, such as the JPC-12. It needs to be used with a SPIKE.

The spikes purchase links are as follows:

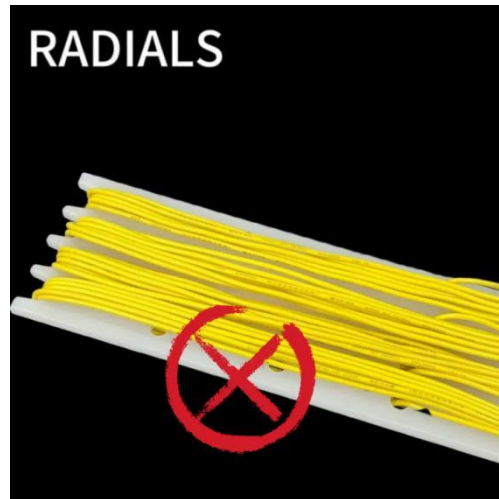

MC-750 SPIKE: <https://chelegance.com/products/mc-750-antenna-parts-replacements/>

JPC-12 SPIKE: <https://chelegance.com/products/jpc-antenna-replacements/>

2. When used in combination with the MC-750 antenna, you need to remove the screws and gaskets on the spike, and then install the ground disc to ensure a stable installation. Like these:

3. The yellow radial of the MC-750 antenna is not compatible with the ground disc.

4. When in use, it is necessary to make a radial by yourself. Note: The radial should be made of 0.75-square RV wire. It is necessary to weld the **0.75-square RV wire** to the golden metal needles.
